Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-51, drawn to a recording apparatus and a foreign material removal method, classified in Class 101, subclass 425.

II. Claims 52-60, drawn to an adhesive roller per se used in a recording apparatus, classified in class 399, subclass 357.

Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the recording apparatus of Group I does not require an adhesive roller having regulation disks of Group II to be operative. The subcombination has separate utility such as cleaning toner on the surface of an image drum in a copy machine.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
